Edgebreaker

Komprese trojúhelníkových sítí

Jakub Vokoun

Fakulta aplikovaných věd ZČU

javok@students.zcu.cz

2026-11-04

1. Motivace

1.1 Dobový kontext

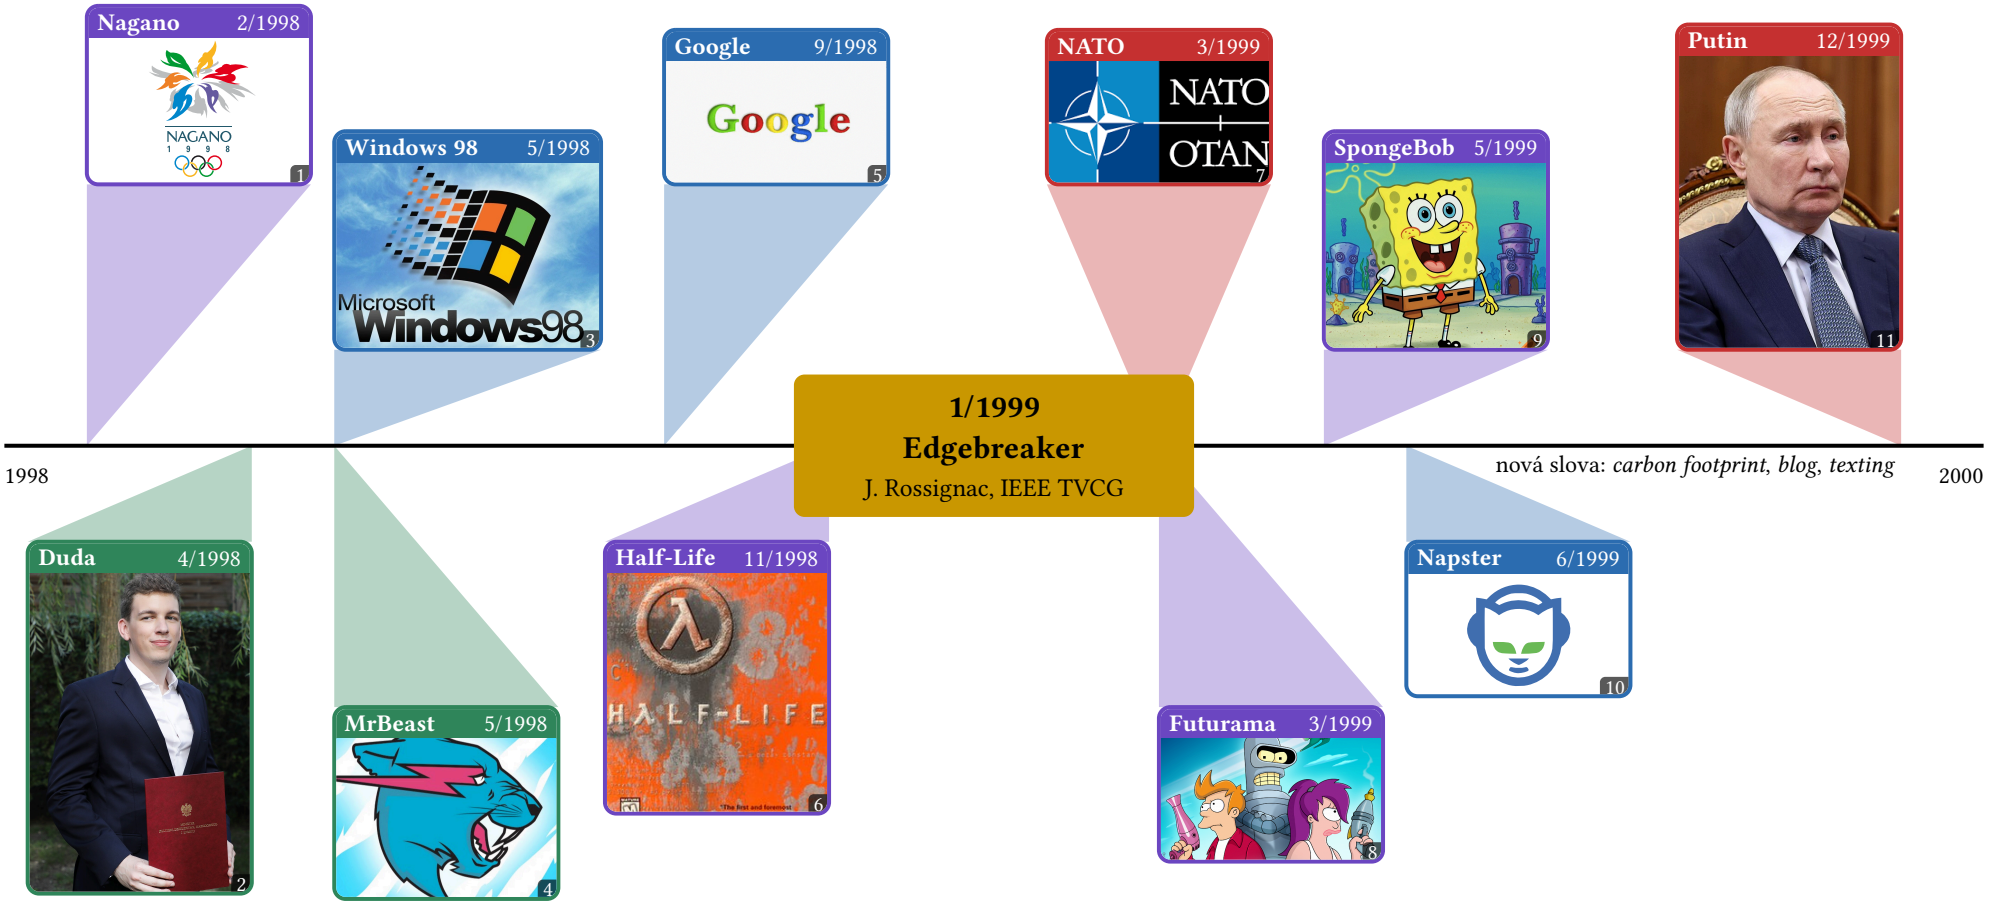

Figure 1: Dobový kontext vzniku algoritmu Edgebreaker.

3. Komprese

3.1 Omezení

Mesh musí být **orientovatelný manifold** homeomorfní s koulí/kruhem.

Lehce upravená verze algoritmu zvládne i *díry* a *handly*, obecně meshe s vyšším genusem.

4. Dekomprese

4.1 Možnosti

Existuje víc algoritmů, implementuji spirale-reversi a wrap&zip.

Demonstrováno na wrap&zip, je intuitivnější.
